QATAR PPGI / PRE-PAINTED GALVANIZED IRON COIL

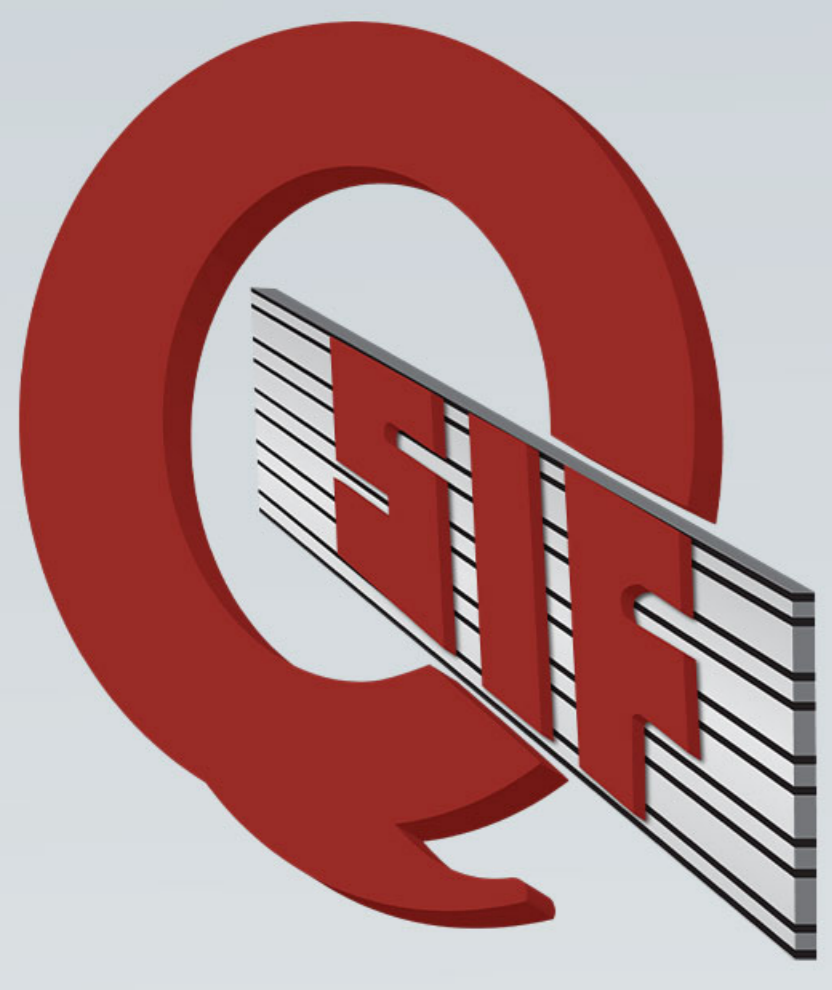

PPGI is pre-painted galvanized iron also known as pre-coated steel, coil coated steel, colour coated steel etc. typically with a hot dip zinc coated steel substrate. The term is an extension of GI, which is a traditional abbreviation for galvanized iron. We're a leading manufacturer and supplier of colour coated coils or PPGI coils in the region at most competitive prices.

We're leading suppliers with more than 40 years of experience in PPGI, GI, Hot Rolled and Cold Rolled Coils. Colour coated coils are widely used in building, roofing, transport, home appliances, solar energy, furniture and much more. There are countless end uses for PPGI coils. PPGI Coils exhibit high degrees of strength and dimensional accuracy for use in various manufacturing industries spanning a wide range of sectors. We offer the 0.3 mm to 6.00 mm thickness and 1000 mm to 1250 mm width of the pre-painted galvanized iron coils. Colour coated coils are having the highest standard of manufacturing.

Key features of our PPGI Coils are below:

- Rust or corrosion free
- ASTM, EN, JIS, BIS standards
- 40g to 180g / m² coating availability
- High Flexibility
- High temperature resistance

PPGI COIL

TECHNICAL DATA SHEET

QATAR STEEL

INDUSTRIES FACTORY (W.L.L)
مصنع قطر للصناعات الحديدية

PRE-PAINTED GALVANIZED IRON COIL

THICKNESS	0.30 mm - 0.90 mm
MATERIALS SURFACE TREATMENT	Pre-Painted Galvanized Iron (PPGI)
WIDTH	1220 mm
APPLICATION	Electronic Machines, Manufacturing Containers, Architectural Windows and Automobile Industry.
GRADES AVAILABLE	ASTM, EN, JIS, BIS
COATING AVAILABILITY	40g - 180g /m ²
